

Sustainability Consultant Intern

JOB TITLE

Sustainability Consultant Intern

PURPOSE

The purpose of this internship is to support LifeCity's sustainability consulting services by attending on-site assessments and creating impact reports that highlight the social and environmental impact opportunities for manufacturers and other companies.

LOCATION

Computer work can be conducted anywhere within the Greater New Orleans Area. The job requires in-person presence in New Orleans and travel throughout the state. A car is required as assessments will be conducted throughout the State of Louisiana.

AREAS OF RESPONSIBILITY

1. LIFECITY CONSULTING

- Intern will support on-site manufacturing sustainability assessments
- Intern will research social and environmental opportunities for manufacturing companies using the help of our database and other online resources

- Intern will complete impact reports to be presented to clients with the help of the LifeCity team

THE APPROACH

- **Independent learner:** This position will require someone to be willing to research solutions at each location using our existing database of solutions.
- **Organized:** This position requires strong organizational skills to ensure that all deliverables are finalized on time.
- **Analytical thinker:** Ideally this candidate can help do calculations that measure waste and energy reductions with the support of the LifeCity Team.
- **Willing to learn:** This position requires the ability to take feedback and build on it to meet our company and community's needs.
- **Communication:** This position requires communication to help ensure that deliverables are met on time, support is provided as needed, and project management is moving forward.

OPPORTUNITY FOR GROWTH

LifeCity is very proud of its internship program. Throughout its history interns have frequently evolved into part of our staff. Following this tradition, this internship is designed to offer a career path to students that wish to engage with the impact investment sector. This position may turn into a job opportunity in the future (as soon as this summer).
